

SL905

1000 Class O Insulated Gloves

When working in high-risk electrical environments, safety is non-negotiable. Our Class 0 1000V Electricians Gloves provide superior protection, enabling you to work with confidence when handling live electrical equipment.

Key Features

Protection You Can Trust: Designed to safeguard against electrical shocks up to 1000 volts (AC/DC), ensuring peace of mind during critical tasks.

Unmatched Comfort & Dexterity: Engineered with an anatomical shape for a snug, comfortable fit that allows excellent hand mobility and precision.

Durability You Can Rely On: High dielectric strength coupled with resistance to wear and tear makes these gloves ideal for professional use.

Enhanced Safety Design: With a standard length of approximately 360mm, these gloves provide extended protection for your wrists and forearms.

Care & Maintenance

Maximise the lifespan and performance of your gloves:

- Store them in a cool, dry area away from direct sunlight and chemicals.
- Always inspect for cuts, cracks, or punctures before each use.
- Schedule regular testing to ensure compliance with safety standards

Specifications

Material: Premium natural rubber/latex

Standards Compliance: EN 60903:2003, IEC 60903:2014

Available Sizes: 8 (Medium) to 10 (X-Large)

Colour: Cream

Size Part Numbers

SL905M: Medium Size 8

SL905L: Large Size 9

SL905L: X-Large Size 10

Applications:

Solar PV Installations | Electrical maintenance and repairs |
Construction and utility projects | Telecommunications systems |
Automotive and industrial applications
